

**PUBLIC NOTICE
FIVE-YEAR REVIEW
INSTALLATION RESTORATION SITES 26 AND 28
FORMER NAVAL AIR STATION MOFFETT FIELD
MOFFETT FIELD, CALIFORNIA**

November 2018

The Department of the Navy (Navy) is currently conducting the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) Five Year Review at the Former Naval Air Station (NAS) Moffett Field, California. The Former NAS Moffett Field is located 35 miles south of San Francisco and 10 miles north of San Jose. The Navy is conducting the Five-Year Review in accordance with the requirements of CERCLA Section 121(c). The purpose of the Five-Year Review is to determine whether the remedies selected for implementation in the Record of Decision (ROD) documents at Installation Restoration (IR) Sites 26 and 28 are and remain protective of human health and the environment.

IR Site 26: To evaluate a more effective remedy, the Navy discontinued groundwater extraction and treatment at Site 26, and completed a source-area characterization and treatability study in 2011. A Proposed Plan was completed in 2012, and a ROD Amendment for Site 26 was finalized in 2014 to amend the remedy to include in-situ bioremediation treatment, monitored natural attenuation (MNA), and institutional controls instead of the prior groundwater pump-and-treat remedy. A Remedial Design/Work Plan for the bioremediation was finalized in November 2018, and the project is currently underway.

IR Site 28: In 2016, NASA assumed operational, maintenance, monitoring and reporting responsibilities for IR Site 28. The Navy is currently working on addressing vapor intrusion concerns related to the volatile organic compounds (VOCs) in shallow groundwater and possible remedies for the source areas associated with IR Site 28 (i.e., Building 88 Dry Cleaners and Traffic Island Area).

The Navy plans to issue a Draft Five Year Review Report of findings to United States Environmental Protection Agency and California Regional Water Quality Control Board, San Francisco Bay Region for review; the final Report will be issued in February 2020. The Navy will issue another Public Notice announcing the completion of the Five-Year Review. Questions or comments on the preparation of this CERCLA Five-Year Review or other Navy environmental activities at the former NAS Moffett Field may be directed to:
